Question:

How can I perform gear calibration on MyChron5?

Answer:

Follow the instruction you find in this document:

http://aim-sportline.com/download/doc/eng/mychron5/Calcolo_marce_MyChron5_100_eng.pdf

Please note: although karts usually start engaging the second gear and thereby the first one is not displayed, during learning lap the first gear must be engaged, in order to have a complete calibration.
