This tutorial explains how to connect Volkswagen cars to AiM devices.

## 1 Car models and years

---

Supported car models and years are:

- |                       |                        |           |
|-----------------------|------------------------|-----------|
| • Volkswagen Polo     | 4 <sup>th</sup> series | 2001-2009 |
| • Volkswagen Polo     | 5 <sup>th</sup> series | from 2009 |
| • Volkswagen Jetta    | 5 <sup>th</sup> series | 2005-2011 |
| • Volkswagen Jetta    | 6 <sup>th</sup> series | from 2011 |
| • Volkswagen Scirocco | 3 <sup>rd</sup> series | from 2008 |
| • Volkswagen Golf     | 5 <sup>th</sup> series | 2003-2008 |
| • Volkswagen Golf     | 6 <sup>th</sup> series | 2008-2012 |

## 2 CAN bus connection

---

Volkswagen cars ECU features a data transmission bus based on CAN.

CAN connection cables can be found in different places: behind the instrument cluster, near the steering column, behind the fuse box or the glove box inside the main wiring loom. Regardless of the stock ECU installed on your car, colours of the cables you need to connect to AiM devices are always the same, they are twisted and you can see them here below.

<b>Pin function</b>	<b>Volkswagen ECU cable colour</b>	<b>AiM cable label</b>
CAN High	Orange/Black	CAN+
CAN Low	Orange/Brown	CAN-

## AiM device configuration

---

Before connecting the ECU to AiM device set this up using AiM Race Studio software. The parameters to select in the device configuration are:

- ECU manufacturer "Volkswagen"
- ECU Model "VWGroup"

### 4

## Available channels

---
