PC technical specifications

Question:

Which hardware specifications are mandatory for my PC, in order to make the AiM softwares work without errors or slowdowns?

Answer:

In the tab below, the main PCs technical specifications are mentioned, so that the AiM softwares are correctly supported:

Operative Systems:

- **Windows Vista** 32bit/64bit
- **Windows 7** 32bit/64bit
- **Windows 8/8.1** 32bit/64bit
- **Windows 10** 32bit/64bit

64bit Windows versions are preferables

Memory (RAM):	4GB (or higher)
Hard Drive:	500GB (or higher; better with SSD than with HDD)
Screen resolution:	1024 x 768 (or higher)
Processor:	i5 (or higher)
Mac:	If the installation must be performed on a PC with Mac O.S., download a virtualized version of Windows (Parallels, VirtualBox, VMware) among the ones mentioned before, from whom execute the installation procedure.

Antivirus Softwares:

In order not to have both data download and devices identification errors, it is necessary to add the software installation path into the folders list the antivirus software effect makes exception for. Visiting the Documentation -> Firmware/Software of our website www.aim-sportline.com, documents that explain this process step by step are available.

**N.B.: all the AiM drivers are approved by Microsoft®;
the .exe file authenticity is guaranteed.**
